Trust & security scenarios 6th

March

What if people trust devices they own and hold, not services?

What if the future internet is subject to relentless attacks from cyber criminals?

What if the Future Internet develops into an information economy?

What if business is dispersed to a global ecosystem of service providers deep process and information integration ?

What if all ICT infrastructure is shared and service oriented?

Trust & security scenarios 6th

March

Incremental Visionary

Citizen-
centric

Business-
centric

Incremental	Visionary
Red	Green
Blue	Yellow
