

FIREWORKS

Deploying on FIRE Session conclusions

Session moderator

Anastasius Gavras, Eurescom GmbH

FIREWORKS

Original aim

- Possible outcome 1: actions for creating necessary specifications to satisfy deployment requirements on FIRE facilities

FIREWORKS

Agree on aspects such as ...

- A common language for resource descriptions
- A common language to describe experiments
- A common language to describe results
- Standardized APIs to access resources
- Single sign-on / one-stop shop – i.e., a common approach for managing user credentials
