

2nd GENI-FIRE Workshop

Suzi Iacono, NSF

July 22, 2009

Seattle, WA

Welcome

- 1st GENI-FIRE workshop Madrid December 2008 (7 months ago)
 - 12 people from US; similar number from EC
 - Presentations from the various control frameworks
 - Focus on federation but clear that there was a lack of understanding about each other's technical parameters
- 2nd GENI-FIRE workshop Seattle July 2009
 - 10 people from the EC; 17 from US
 - Agenda is somewhat similar

Four questions

- 1: What, if any, progress has been made between then and now?
 - PlanetLab, OneLab2 – already working together
 - ORCA and PanLab discussions
 - Some EC projects are subcontracts on US proposals to the most recent GPO call for proposals
 - Trip to Lulea for FIREWeek and Living Labs
- 2: What does we mean by GENI and FIRE federation? How do we get there? What are the requisite steps?
- 3: Under what conditions do we hold the third GENI-FIRE workshop?
- 4: How do we measure success?
