

Panel: FIRE challenges, session 1

Clean-slate approaches: needs and opportunities from FIRE

Moderator: Mário Campolargo

Acting Director, Emerging Technologies and Infrastructures, EC

Introductions:

- **Martin May (ETH Zurich)**
- **Roger Torrenti (Orionis)**
- **Henrik Abramowicz (Ericsson)**

FIRE Launch Event, Paris 10 September 2008

Points to be discussed (initial suggestions)

- Revolutionary versus evolutionary approaches: motivations and relative advantages
- New perspectives in network and service architectures
- Socio-economic issues: network neutrality, impact on quality of life
- How can FIRE support an effective comparison of new network architectures
- Why do we need an experimentally-driven approach to long-term research
