 - *finalized,*
 - *to be published during ICT-2008 in Lyon*

Manifesto for the deployment of ICT test facilities and prototype infrastructures

- **ICT is key for Europe :**
 - improving Citizen daily life and Competitiveness
 - The propagation of ICT increases the productivity, improves competitiveness and supports growth
- **Our Recommendations**
 - Rec 1 : The public action must encourage creation of new services and allow the appropriation of the technological tools.
 - Rec 2 : Base any the public intervention in these fields on solid experiments and pilots trials.

Manifesto for the deployment of ICT test facilities and prototype infrastructures

- **Investing in the deployment of the advanced test-beds offers to Member States, Region and Cities opportunities :**
 - **to create a dynamic for in place SMEs and to attract new ones**
 - **to build a highly skilled workforce**
 - **to train engineers to doctorate level on emerging technologies,**
 - **to educate citizens on new ICT usages and services which are the pillar for access to knowledge.**

Overview

Example

- Germany/ **Easy-C project**
- Fr -I&R /**Poseidon projects**
- Oulu / **Octopus network**
- Fr- Cap-digital/ **THD-FTTH**
- Reach Communication Suite
- Fr -I&R /**Neptune projects**
- Stockholm / **Pats projects**
